(NSW)

Dear Patient

We are happy to announce that my friend Tobias Hall has agreed to take over my musculokeletal patients.

Tobias is the head clinician at Featherston St Pain Clinic - located on the corner of Featherston St. & Waring Taylor St..

Tobias and I have similar philosophies when it comes to pain management, and we are certain he will take great care of those of you who choose to consult him moving forward.

Tobias believes wholeheartedly that timely hands on care; combined with appropriate exercise is the key to managing most pains.

It's important to note that Tobias is not a GP - he is a physical therapist. His training includes exercise physiology, biomechanical correction, sports injuries, acupuncture, rehabilitation and chiropractic care; he has 20 years of hands on clinical experience. Nonetheless, Tobias won't be able to offer the medical portion of the consults you have received from me over the years.

We are now very confident you will be in good hands when I retire in February.

Kind Regards

John & Jackie Gyenge

.....
